

We  
deliver.

Aurizon Mt Isa Line  
Integrated Freightliner (MILI Freightliner)  
**Townsville — Mt Isa — Townsville**

A new rail  
freight  
solution  
between  
Townsville  
and Mt Isa.

A better outcome for the community and your business.

Rail is the safest and most environmentally friendly mode of land freight transport, delivering significantly less greenhouse gas emissions when compared to road freight (dependent on commodity and length of haul).

Research shows that for every tonne kilometre of freight moved, the rate of road accidents is 20 times higher by road than by rail.\* That's why we encourage our customers to choose rail over road for longer distances to achieve improved operational, safety and environmental outcomes while significantly reducing their land transport carbon footprint.

*\*The Deloitte Access Economics "Value of Rail 2020" report commissioned by the Australasian Railway Association (ARA).*

**Did you know?**

Moving 100 tonnes of freight by rail from Mt Isa to Townsville saves approximately 940 litres of diesel fuel and prevents 2.6 tonnes of CO2 (carbon dioxide) emissions.

See the difference your business can make by switching from road to rail. Simply add your freight details into our handy emissions calculator at [aurizon.com.au/sustainability](https://www.aurizon.com.au/sustainability)

A close-up, profile view of a man wearing an orange Aurizon bucket hat, sunglasses, and a high-visibility orange work shirt with reflective silver stripes. He is wearing white work gloves and holding a red and black walkie-talkie to his mouth. The background is a blurred industrial setting with a large yellow train engine and bright lights.

At Aurizon ‘we know safe, we choose safe’

At Aurizon, nothing is more important to us than the safety of our people and the delivery of safe and reliable transport services for our customers.

**‘We know safe, we choose safe’** describes our core ‘Safety’ value and broadens our focus so that we are not concentrating just on the value or the outcomes: we focus on how we work to protect ourselves and others. It recognises that we are skilled in what we do, we understand what it means to be safe and reinforces the personal commitment our people make to delivering safely each and every day.
